WORK EXPERIENCE

Amazon

Seattle, WA

Business Intelligence Engineer Intern

June 2025 – September 2025

- Saved 92 hours/week of manual analysis by building a Claude-based AI agent with AWS Lambda to pull schemas and analyze/forecast global return costs in 3 minutes with SQL and ML; Sourced requirements from EU/US finance & product teams
- Developed two automated Cline AI-agent-creation workflows based on learnings from creating the cost per unit agent, enabling engineers to generate working Claude-based agents in 5 minutes and cutting development time by 20%; Documented all results
- Investigated unreconciled EU returns by building SQL queries and automating ETL pipelines, analyzing backhaul carrier data to identify fulfillment inefficiencies and automate reporting. Designed QuickSight dashboards tracking return metrics

Savie Health

Remote/Lompoc, CA

Revenue Manager

February 2025 – September 2025

- Developed SARIMA forecasting algorithms to predict monthly Medi-Cal revenue with 95% accuracy and ensure timely payments
- Rebranded organization's website using WordPress and designed reports on monthly enhanced care management statistics

Data Analyst/Marketing Coordinator

July 2022 – February 2025

- Created promotional graphics and e-blasts in English and Spanish to advertise the startup nonprofit and helped secure over \$100,000 in funding and 1,500 monthly social media engagements through email marketing and data reports for grant requests

San Francisco District Attorney's Office

San Francisco, CA

San Francisco Sentencing Community Initiatives Data Fellow

June 2023 – September 2023

- Created a regenerable temporal and geospatial data memo for distribution to community members across the city using HTML, JavaScript, and Python Plotly to visualize crime trends in San Francisco supervisor and police districts
- Analyzed several databases of over 200,000 county crime records and visualized crime location trends using Geopandas, R, Plotly, and ArcGIS for grant requests. Wrote comprehensive documentation on how to analyze and map geospatial data

ACADEMIC EXPERIENCE

UCSB Department of Computer Science

Santa Barbara, CA

Lead Undergraduate Learning Assistant (ULA)

April 2023 – Present

- Designed LLM-integrated assessments for one of the first UCSB classes to incorporate generative AI into instruction, introducing students to data science through prompt-based analysis, model-assisted coding, and language model evaluation
- Tutored weekly class sections of 30 beginner data science students in table operations, hypothesis testing, bootstrapping, statistical prediction techniques, linear regression, data visualization, clustering, and classification concepts

UCSB Computational Psycholinguistics of Listening and Speaking Lab

Santa Barbara, CA

Research Assistant

January 2023 – Present

- Authored "[Deepening understanding of frequency effects in exemplar models of language change](#)" for CAMP[7] conference
- Built dynamical systems models of language change in Python by deriving and implementing formulas for model analysis
- Developed an SQL tool to query word frequency and score data from 1,000 relational databases and determined best samples by calculating Jensen-Shannon divergence 1,000 times for 30 classifications of data using kernel density curves

Daily Nexus

Santa Barbara, CA

Data Editor and Games Section Founder

September 2022 – Present

- Oversaw the production of over 75 data-driven articles and mentored more than 100 student journalists on data storytelling, sourcing, and visualization, leading to multiple statewide awards: 1st Place for Best Multimedia Package (2025), 2nd Place for Best Interactive Graphic (2024), and 1st Place for Best Infographic (2023) from the California College Media Association
- Founded the Games section and launched its website, making the Nexus one of the first college newspapers with a dedicated games page. Designed interactive crosswords with JavaScript and taught workshops on data visualization, NLP, and web scraping
- Self-taught Python to build interactive charts and interviewed government/academic officials to write SB County news articles

SELECTED PROJECTS

- [p5.chart](#): Developed an interactive, mobile-responsive programming library for p5.js that supports bar, histogram, table, scatter, geo, series, and pie/donut charts, alongside methods for DataFrame construction; Documented full library functions and methods
- [Pattern Illustrator](#): Built a drawing and animation tool using HTML/CSS/JavaScript that enables users to directly and efficiently design pattern drawings. Integrated the Gemini API to build text-to-palette and text-to-sketch features; Prototyped in Figma

EDUCATION

University of California, Santa Barbara: 3.98 GPA

Santa Barbara, CA

B.S. Statistics and Data Science | B.A. Theater (Design) | Minor: Language and Speech Technologies September 2022 – March 2026

Skills: Adobe Creative Suite, ArcGIS, AWS, D3.js, ETL, Excel, Figma, HTML/CSS/JavaScript, Python, QuickSight, R, SQL, Tableau
