WORK EXPERIENCE

Daily Nexus

Data Editor

Santa Barbara, CA

September 2022 – March 2026

- **Engineered and analyzed datasets** for interactive data stories using Python, JavaScript, public records, and newsroom analytics, covering housing, transportation, elections, DEI, and community trends for 30,000+ UCSB students and Santa Barbara residents.
- Oversaw the production of 75+ data-driven articles and managed 100+ student journalists on data storytelling, sourcing, and visualization, leading to **five statewide journalism awards** for multimedia packages.
- Developed the UCSB Grades dashboard, featuring 16 years of grade distribution data, 40,000+ classes, and 400,000+ annual page views. Implemented recurring checks for missing values, duplicate courses, department mappings, and metric consistency.

UCSB Computer Science Department

Lead Undergraduate Learning Assistant (ULA)

Santa Barbara, CA

April 2023 – March 2026

- Designed **LLM-integrated assessments** for one of the first UCSB classes to incorporate generative AI into instruction, introducing students to data science through prompt-based analysis, model-assisted coding, and language model evaluation.
- Tutored weekly class sections of 30 beginner data science students in table operations, hypothesis testing, bootstrapping, geographic analysis, statistical prediction techniques, linear regression, data visualization, clustering, and classification concepts.

Amazon

Business Intelligence Engineer Intern

Seattle, WA

June 2025 – September 2025

- Saved **92 hours/week** of manual analysis by building a Claude-based **AI agent** with AWS Lambda and S3 to pull schemas and analyze/forecast global return costs in 3 minutes with SQL and ML, sourcing requirements from EU/US finance teams.
- Developed two automated **agent-creation platforms** based on learnings from creating the cost-per-unit agent, enabling engineers to generate working Claude-based agents in 5 minutes and **cutting development time by 20%**.
- Built and automated SQL-based ETL pipelines to ingest, transform, document, and validate EU returns data, creating reliable reporting datasets for QuickSight dashboards across fulfillment nodes and regional markets.

Savie Health

Revenue Manager

Remote/Lompoc, CA

February 2025 – September 2025

- Developed **Python SARIMA** forecasting models to predict monthly revenue with **95% accuracy**, improving financial planning.
- Built recurring KPI dashboards and operational reports in Excel to track Enhanced Care Management performance and funding outcomes, structuring reporting data across time, program, provider, patient segment, and outcome dimensions.

Data Analyst/Marketing Coordinator

July 2022 – February 2025

- Performed community segmentation using CRM exports, Excel, and GIS tools to improve resource allocation.
- Launched bilingual campaigns, driving **1,500+ monthly engagements** across social channels and securing **\$100,000+** in funding.

San Francisco District Attorney's Office

San Francisco Sentencing Community Initiatives Data Fellow

San Francisco, CA

June 2023 – September 2023

- Analyzed **200,000+ location-based records** to identify neighborhood-level patterns, hotspot clusters, and temporal shifts and then delivered findings to city stakeholders and community partners.
- Built reusable geospatial intelligence dashboards using Python, Plotly, GeoPandas, and ArcGIS to map crime, mobility, and incident trends across San Francisco supervisorial and police districts, supporting resource allocation decisions.

PUBLISHED PROJECTS

- **p5.chart**: Developed the first interactive, mobile-responsive **programming library** for p5.js that supports bar, histogram, table, scatter, series, and pie charts, alongside methods for DataFrame construction and geospatial map visualizations.
- **Pattern Illustrator**: Built a drawing and animation tool using HTML/CSS/JavaScript that enables users to efficiently design pattern drawings. Integrated the **Gemini API** to build text-to-palette and text-to-sketch features.
- **YesChef AI**: Built a **Next.js cooking app** with Supabase/PostgreSQL, OAuth, Gemini API, and Vercel, designing relational data models for users, recipes, quests, and social challenges to support personalization and engagement tracking.
- **Exemplar Model Simulations Poster**: Developed **language models** to analyze word frequency effects; built a Python pipeline for 10,000+ iteration runs, optimized runtime from 120 minutes to ~30 seconds, and presented findings at CAMP[7] conference.

EDUCATION

Stanford Graduate School of Business

Master of Business Administration, Deferred Admit

Stanford, CA

September 2028 – June 2030

University of California, Santa Barbara

B.S. Statistics and Data Science | B.A. Theater (Design) | Minor: Language and Speech Technologies

Santa Barbara, CA

Highest Honors, Distinction in Major

September 2022 – March 2026

3.99 GPA

Technical Skills: AWS Lambda, ETL, Excel, Git, HTML/CSS/JavaScript, Next.js, PostgreSQL, QuickSight, Python, R, S3, SQL
